

IBM Docket No. BOC9-1999-0008

U.S. Patent Appln. No. 09/605,612  
Amendment Dated Apr. 2, 2004  
Reply to Office Action of Jan. 2, 2004  
Docket No. 6169-142

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the instant application:

Listing of Claims:

1. (Original) A method for concurrently accessing network-based electronic content in a Voice Browser and a Visual Browser comprising the steps of:
- retrieving a network-based document formatted for display in the Visual Browser;
  - identifying in the retrieved document a reference to the Voice Browser, said reference specifying electronic content formatted for audible presentation in the Voice Browser; and,
  - transmitting said reference to the Voice Browser;
  - the Voice Browser retrieving said specified electronic content and audibly presenting said electronic content in the Voice Browser;
  - the Visual Browser visually presenting said network-based document concurrently with said audible presentation.
2. (Original) The method according to claim 1, wherein said network-based document formatted for visual presentation in the Visual Browser is an HTML formatted document and the Visual Browser is a Web Browser.
3. (Original) The method according to claim 1, wherein said electronic content formatted for audible presentation in the Voice Browser is VoiceXML formatted electronic content.

U.S. Patent Appln. No. 09/605,612  
Amendment Dated Apr. 2, 2004  
Reply to Office Action of Jan. 2, 2004  
Docket No. 6169-142

---

IBM Docket No. BOC9-1999-0008

4. (Original) The method according to claim 2, wherein said reference is a coordination markup attribute.

5. (Original) The method according to claim 1, wherein said reference specifies a network-based document containing said electronic content formatted for audible presentation in the Voice Browser,

whereby the Voice Browser can retrieve said specified network-based document through the computer communications network and audibly present said electronic content contained in said specified network-based document, while the Visual Browser can visually present said network-based document formatted for visual presentation.

6. (Original) A method for concurrently accessing network-based electronic content in a Voice Browser and a Visual Browser comprising:

retrieving a network-based document formatted for audible presentation in the Voice Browser;

identifying in the retrieved document a reference to the Visual Browser, said reference specifying electronic content formatted for visual presentation in the Visual Browser; and,

transmitting said reference to the Visual Browser;

the Visual Browser retrieving said specified electronic content and visually presenting said electronic content in the Visual Browser;

U.S. Patent Appln. No. 09/605,612  
Amendment Dated Apr. 2, 2004  
Reply to Office Action of Jan. 2, 2004  
Docket No. 6169-142

IBM Docket No. BOC9-1999-0008

the Voice Browser audibly presenting said network-based document concurrently with said visual presentation.

7. (Original) The method according to claim 6, wherein said network-based document formatted for audible presentation in the Voice Browser is a VoiceXML document.

8. (Original) The method according to claim 6, wherein said electronic content formatted for visual presentation in the Visual Browser is HTML formatted electronic content and the Visual Browser is a Web Browser.

9. (Original) The method according to claim 6, wherein said reference specifies a network-based document containing said electronic content formatted for visual presentation in the Visual Browser,

whereby the Visual Browser can retrieve said specified network-based document through the computer communications network and visually present said electronic content contained in said network-based document, while the Voice Browser can audibly present said network-based document formatted for audible presentation.

10. (Original) A machine readable storage, having stored thereon a computer program for concurrently accessing network-based electronic content in a Visual Browser and a Voice Browser, said computer program having a plurality of code sections executable by a machine for causing the machine to perform the steps of:

U.S. Patent Appln. No. 09/605,612  
Amendment Dated Apr. 2, 2004  
Reply to Office Action of Jan. 2, 2004  
Docket No. 6169-142

IBM Docket No. BOC9-1999-0008

retrieving a network-based document formatted for display in the Visual Browser;  
identifying in the retrieved document a reference to the Voice Browser, said reference  
specifying electronic content formatted for audible presentation in the Voice Browser; and,  
transmitting said reference to the Voice Browser;  
the Voice Browser retrieving said specified electronic content and audibly presenting said  
electronic content in the Voice Browser;  
the Visual Browser visually presenting said network-based document concurrently with  
said audible presentation.

11. (Original) The machine readable storage according to claim 10, wherein said  
network-based document formatted for visual presentation in the Visual Browser is an HTML  
document and the Visual Browser is a Web Browser.

12. (Original) The machine readable storage according to claim 10, wherein said  
electronic content formatted for audible presentation in the Voice Browser is VoiceXML  
formatted electronic content.

13. (Original) The machine readable storage according to claim 11, wherein said  
reference is a coordination markup attribute.

Docket No. 6169-142

IBM Docket No. BOC9-1999-0008

14. (Original) The machine readable storage according to claim 10, wherein said reference specifies a network-based document containing said electronic content formatted for audible presentation in the Voice Browser,

whereby the Voice Browser can retrieve said specified network-based document through the computer communications network and audibly present said electronic content contained in said specified network-based document, while the Visual Browser can visually present said network-based document formatted for visual presentation.

15. (Original) A machine readable storage, having stored thereon a computer program for concurrently accessing network-based electronic content in a Visual Browser and a Voice Browser, said computer program having a plurality of code sections executable by a machine for causing the machine to perform the steps of:

retrieving a network-based document formatted for audible presentation in the Voice Browser;

identifying in the retrieved document a reference to the Visual Browser, said reference specifying electronic content formatted for visual presentation in the Visual Browser; and,

transmitting said reference to the Visual Browser;

the Visual Browser retrieving said specified electronic content and visually presenting said electronic content in the Visual Browser;

the Voice Browser audibly presenting said network-based document concurrently with said visual presentation.

Reply to Office Action of Jan. 2, 2004  
Docket No. 6169-142

IBM Docket No. BOC9-1999-0008

16. (Original) The machine readable storage according to claim 15, wherein said network-based document formatted for audible presentation in the Voice Browser is a VoiceXML document.

17. (Original) The machine readable storage according to claim 15, wherein said electronic content formatted for visual presentation in the Visual Browser is HTML formatted electronic content and the Visual Browser is a Web Browser.

18. (Original) The machine readable storage according to claim 15, wherein said reference specifies a network-based document containing said electronic content formatted for visual presentation in the Visual Browser,

whereby the Visual Browser can retrieve said specified network-based document through the computer communications network and visually present said electronic content contained in said specified network-based document, while the Voice Browser can audibly present said network-based document formatted for audible presentation.

20. (Withdrawn)

21. (Withdrawn)

U.S. Patent Appln. No. 09/605,612  
Amendment Dated Apr. 2, 2004  
Reply to Office Action of Jan. 2, 2004  
Docket No. 6169-142

IBM Docket No. BOC9-1999-0008

22. (Original) A method for modifying a network-based document for supporting concurrent access to network-based voice and visual content in a Voice Browser and a Visual Browser, comprising the steps of:

incorporating visual content in a network-based document;

formatting said network-based document for visual presentation in a Visual Browser;

and,

inserting at least one markup tag in said network-based document, said markup tag containing a coordination markup attribute specifying a network-based document formatted for audible presentation in a Voice Browser,

whereby the Visual Browser when rendering said network-based document formatted for visual display can identify said coordination markup attribute in said markup tag and can transmit a reference to said specified network-based document to the Voice Browser causing the Voice Browser to retrieve said specified network-based document and audibly present said specified network-based document concurrently with the visual presentation of said network-based document formatted for visual presentation in the Visual Browser.

23. (Original) The method according to claim 22, wherein said network based document formatted for visual presentation in a Visual Browser is an HTML formatted document and said Visual Browser is a Web Browser.

U.S. Patent Appln. No. 09/605,612  
Amendment Dated Apr. 2, 2004  
Reply to Office Action of Jan. 2, 2004  
Docket No. 6169-142

IBM Docket No. BOC9-1999-0008

24. (Original) The method according to claim 22, wherein said network based document formatted for audible presentation in a Voice Browser is a VoiceXML formatted document and said Voice Browser is a VoiceXML Browser.

25. (Original) A method for modifying a network-based document for supporting concurrent access to network-based voice and visual content in a Voice Browser and a Visual Browser, comprising the steps of:

incorporating voice content in a network-based document;  
formatting said network-based document for audible presentation in a Voice Browser;  
inserting at least one markup tag in said network-based document;  
said markup tag containing a coordination markup attribute specifying a network-based document formatted for visual presentation in a Visual Browser,

whereby the Voice Browser when rendering said network-based document formatted for audible display can identify said coordination markup attribute in said markup tag and can transmit a reference to said specified network-based document to the Visual Browser causing the Visual Browser to retrieve said specified network-based document and visually present said specified network-based document concurrently with the audible presentation of said network-based document formatted for audible presentation in the Voice Browser.

26. (Original) The method according to claim 25, wherein said network based document formatted for visual presentation in a Visual Browser is an HTML formatted document and said Visual Browser is a Web Browser.

U.S. Patent Appln. No. 09/605,612  
Amendment Dated Apr. 2, 2004
